States of Matter

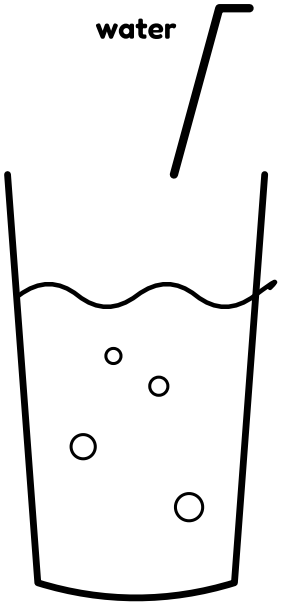

SOLID

ice

LIQUID

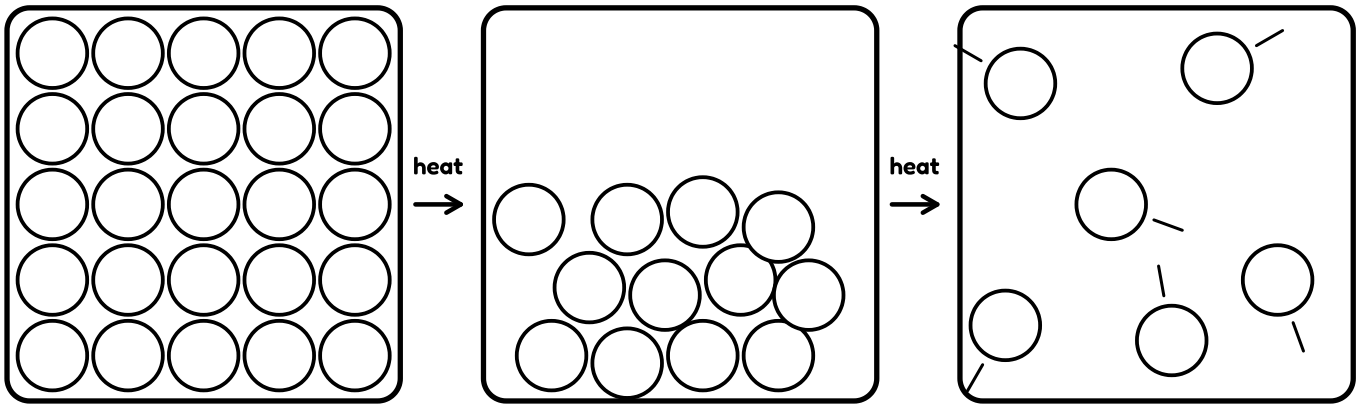

water

GAS

steam

packed tight

slide around

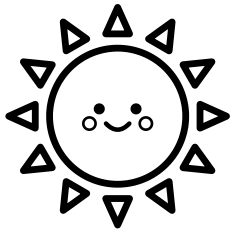

zoom apart

Did you know?

Water can be all three! Ice is a solid, water is a liquid and steam is a gas.

Weather Watch

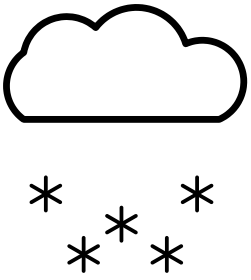

Sunny

Cloudy

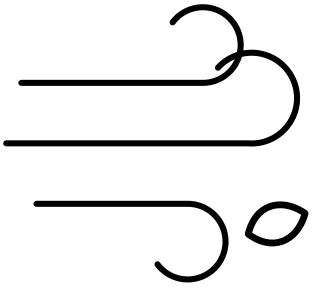

Rainy

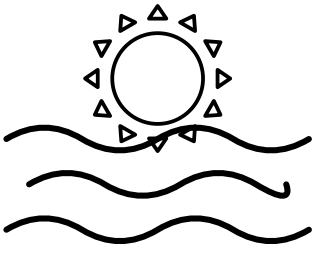

Snowy

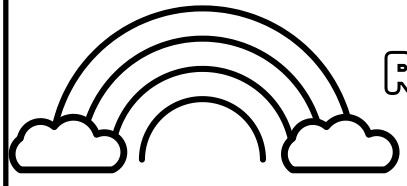

Stormy

Windy

Foggy

Rainbow

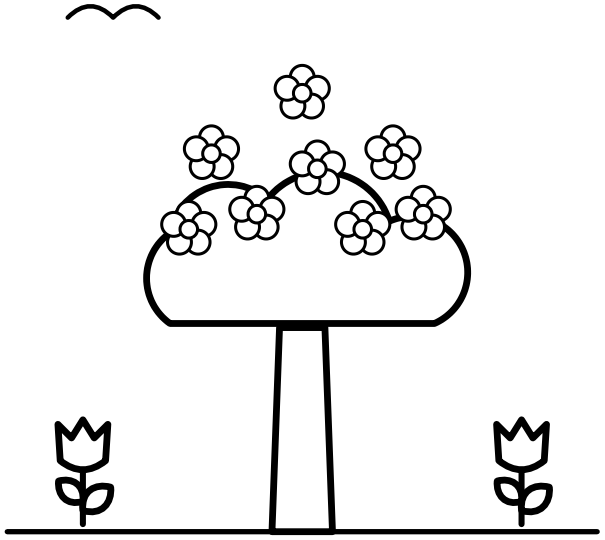

Did you know?

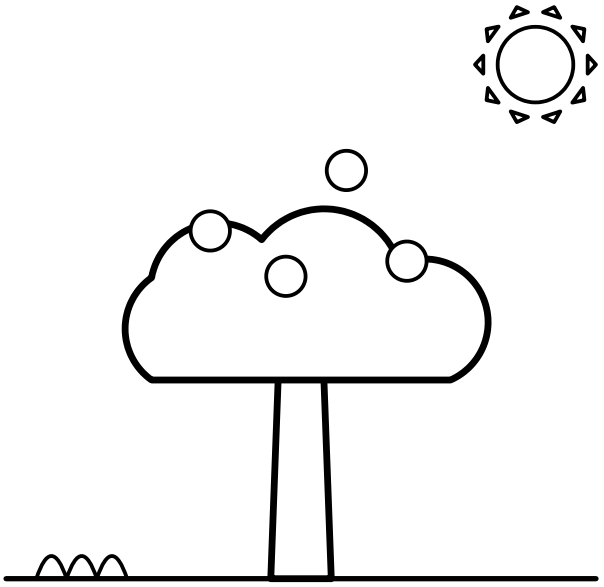

A bolt of lightning is about five times hotter than the surface of the Sun!

http://www.spiderclimbs.com, Avau hardware llc ©2026

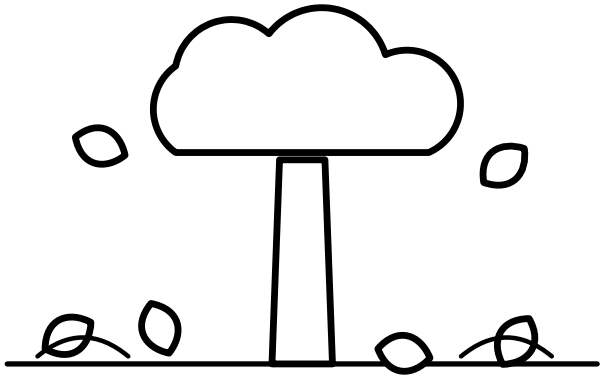

The Four Seasons

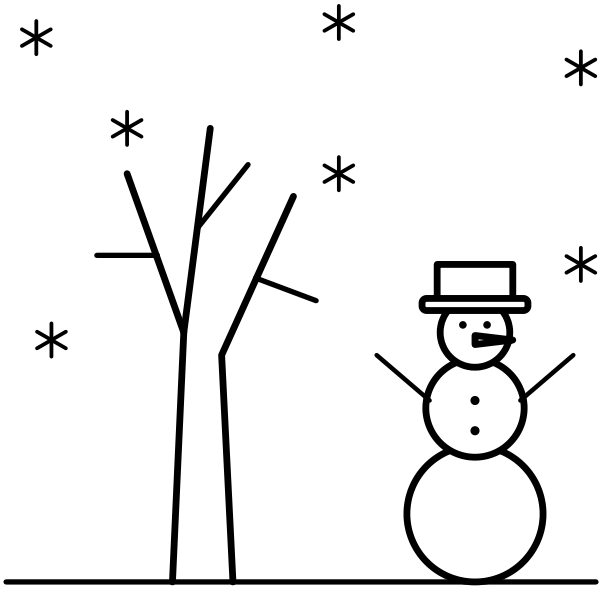

Spring

Summer

Autumn

Winter

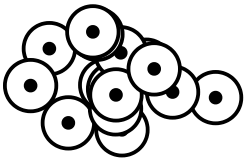

Did you know?

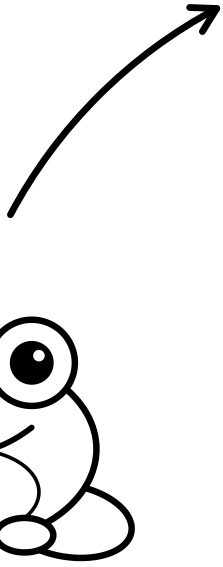

We have seasons because Earth is tilted as it travels around the Sun each year.

Frog Life Cycle

1. Frogspawn

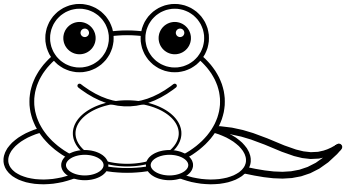

2. Tadpole

4. Frog

3. Froglet

Did you know?

Tadpoles breathe with gills like fish. When they become frogs, they grow lungs to breathe air!

SCIENCE

5

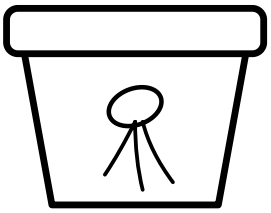

How a Seed Grows

1

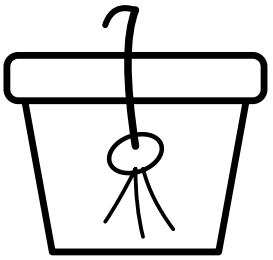

Plant a seed

2

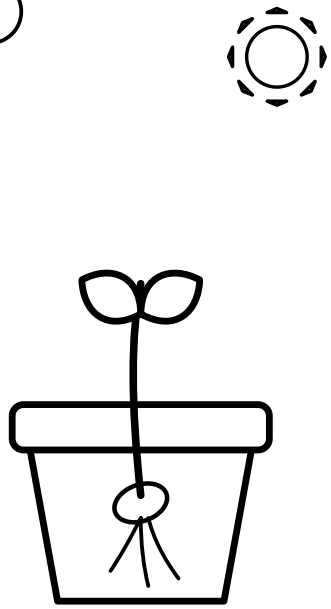

Roots grow

3

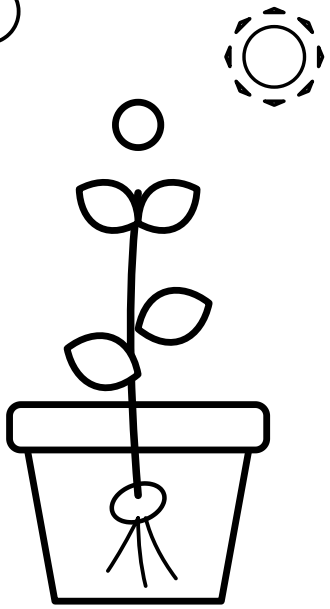

A shoot pops up

4

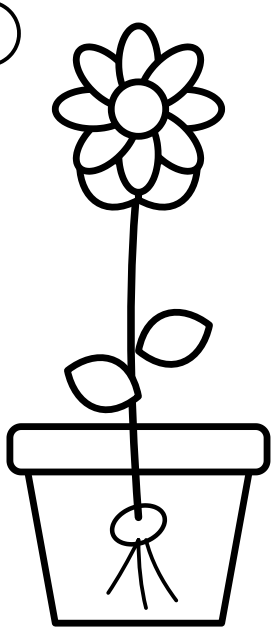

First leaves

5

It grows tall

6

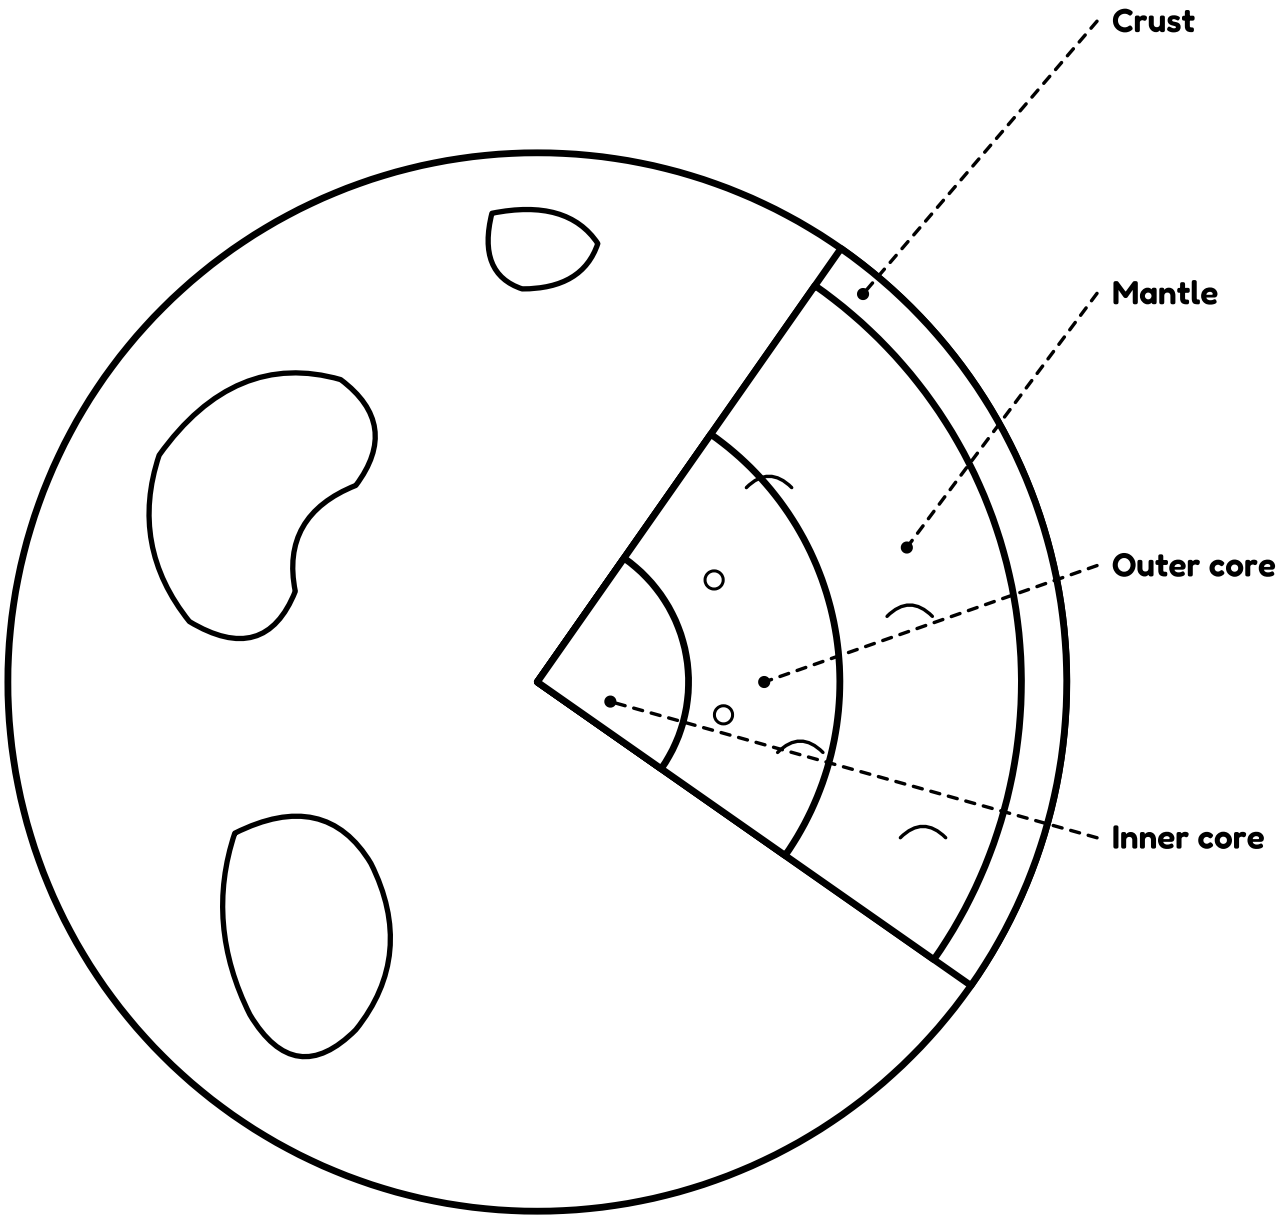

A flower!

Did you know?

Every seed holds a tiny baby plant and a packed lunch of food to help it start growing!

http://www.spiderclimbs.com, Avau hardware llc ©2026

Layers of the Earth

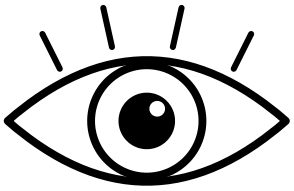

We live on the crust!

Did you know?

The center of the Earth is about as hot as the surface of the Sun!

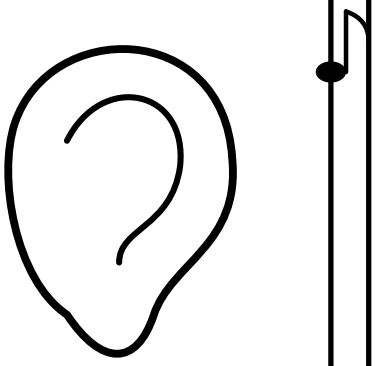

http://www.spiderclimbs.com, Avau hardware llc ©2026

My Five Senses

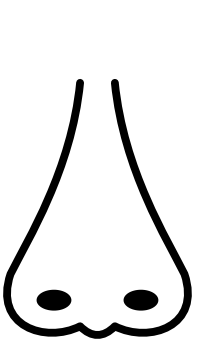

See

with my eyes

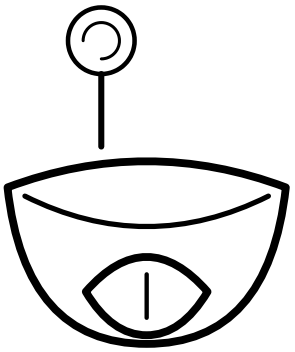

Hear

with my ears

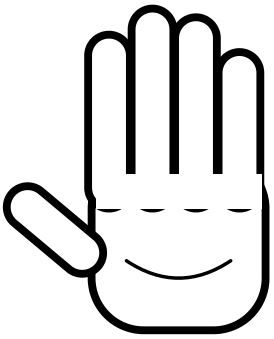

Smell

with my nose

Taste

with my tongue

Touch

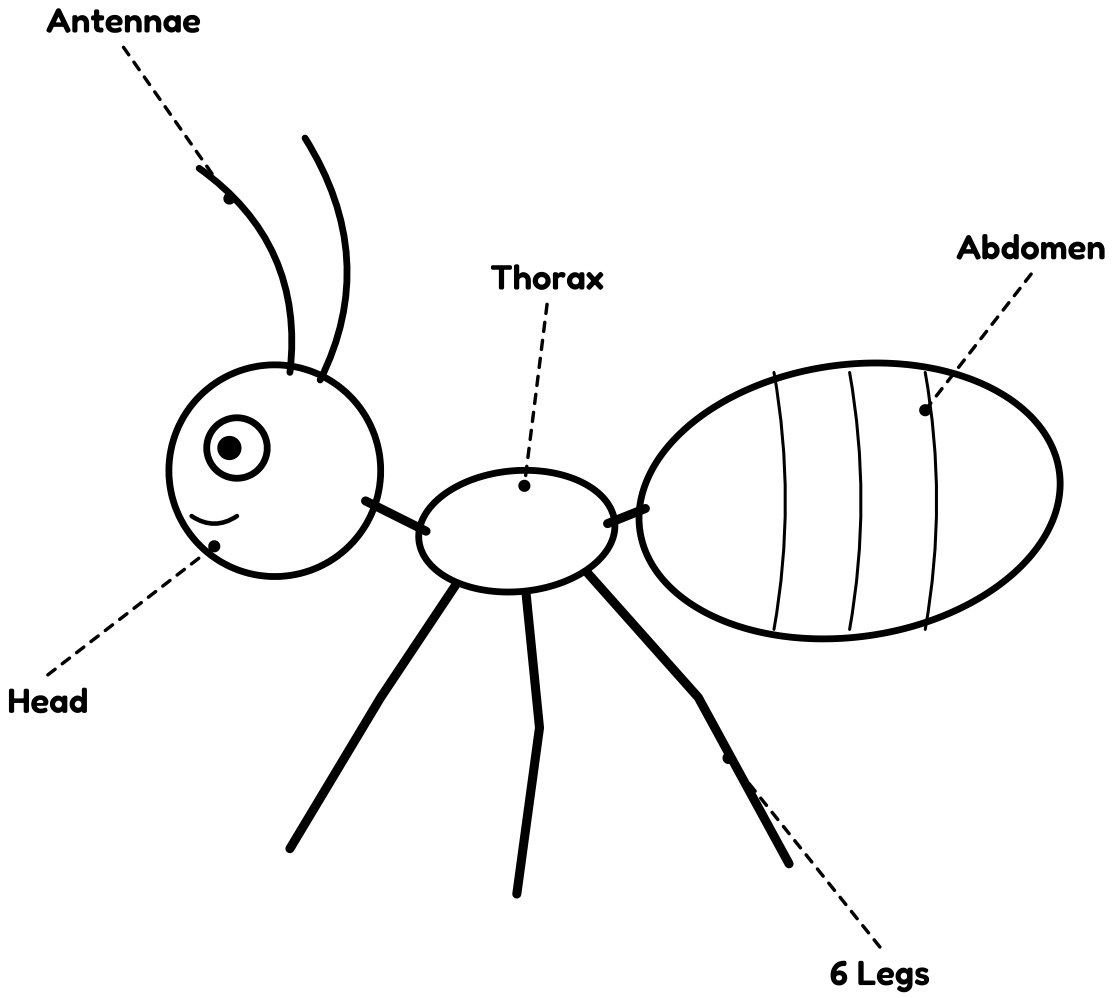

with my skin

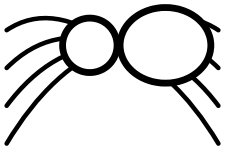

Did you know?

Your tongue is covered with thousands of tiny taste buds!

Parts of an Insect

Spider: 8 legs, not an insect!

Ant: 6 legs, 3 body parts

Did you know?

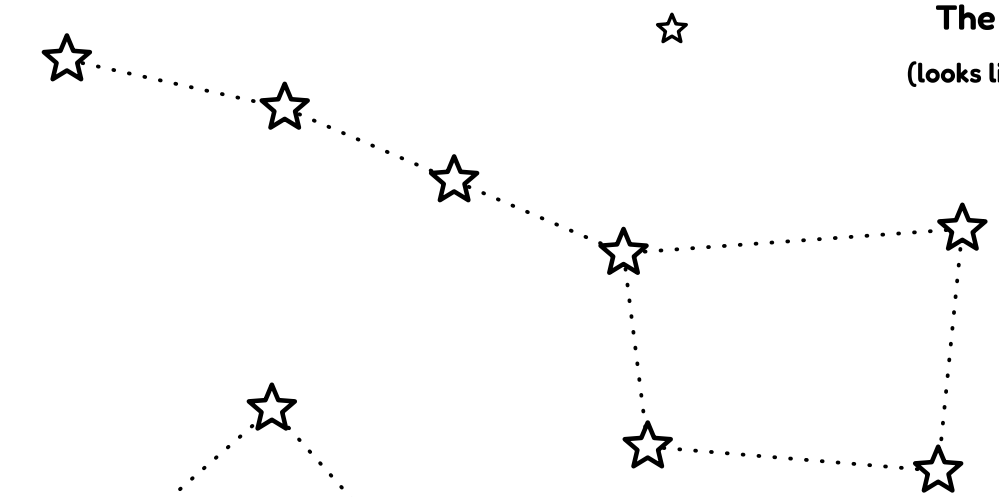

All insects have 6 legs and 3 body parts. Spiders have 8 legs, so they are not insects!

Star Pictures

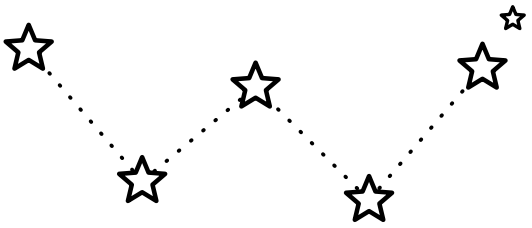

The Big Dipper

(looks like a big spoon!)

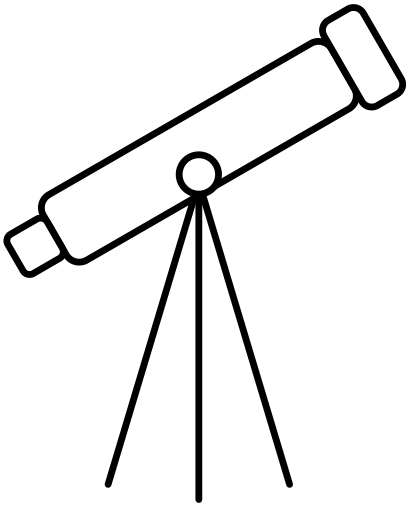

Orion the Hunter

Cassiopeia (a W shape)

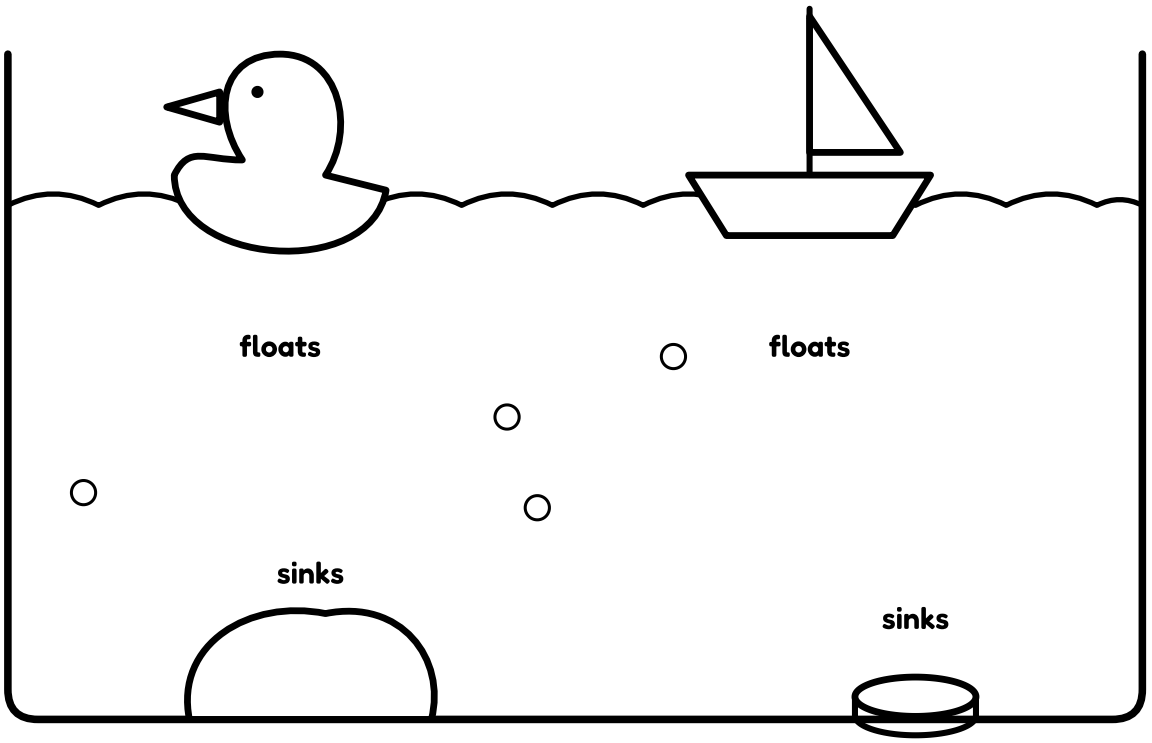

Did you know?

Long ago, sailors used star pictures like a map to find their way across the sea at night.

Sink or Float?

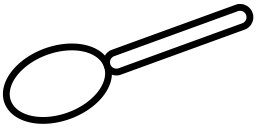

Will it float or sink? Tick a box!

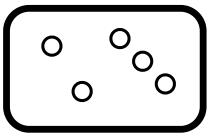

☐ float
☐ sink

Apple

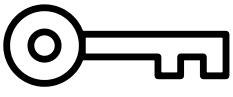

☐ float
☐ sink

Spoon

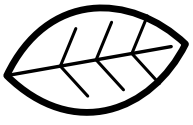

☐ float
☐ sink

Sponge

☐ float
☐ sink

Key

☐ float
☐ sink

Leaf

☐ float
☐ sink

Marble

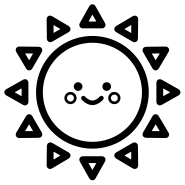

Did you know?

Things float when they are lighter than the water they push out of the way.

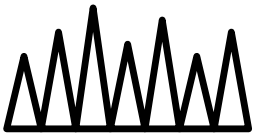

http://www.spiderclimbs.com, Avau hardware llc ©2026

A Food Chain

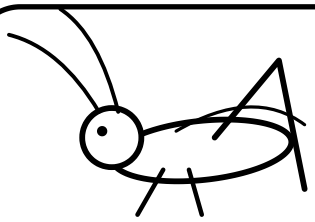

Sun

gives energy to plants

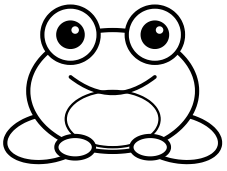

Grass

makes food from sunlight

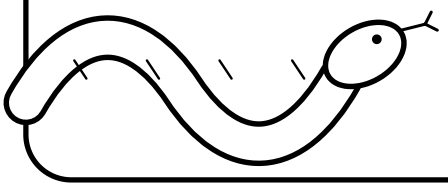

Grasshopper

eats the grass

Frog

eats the grasshopper

Snake

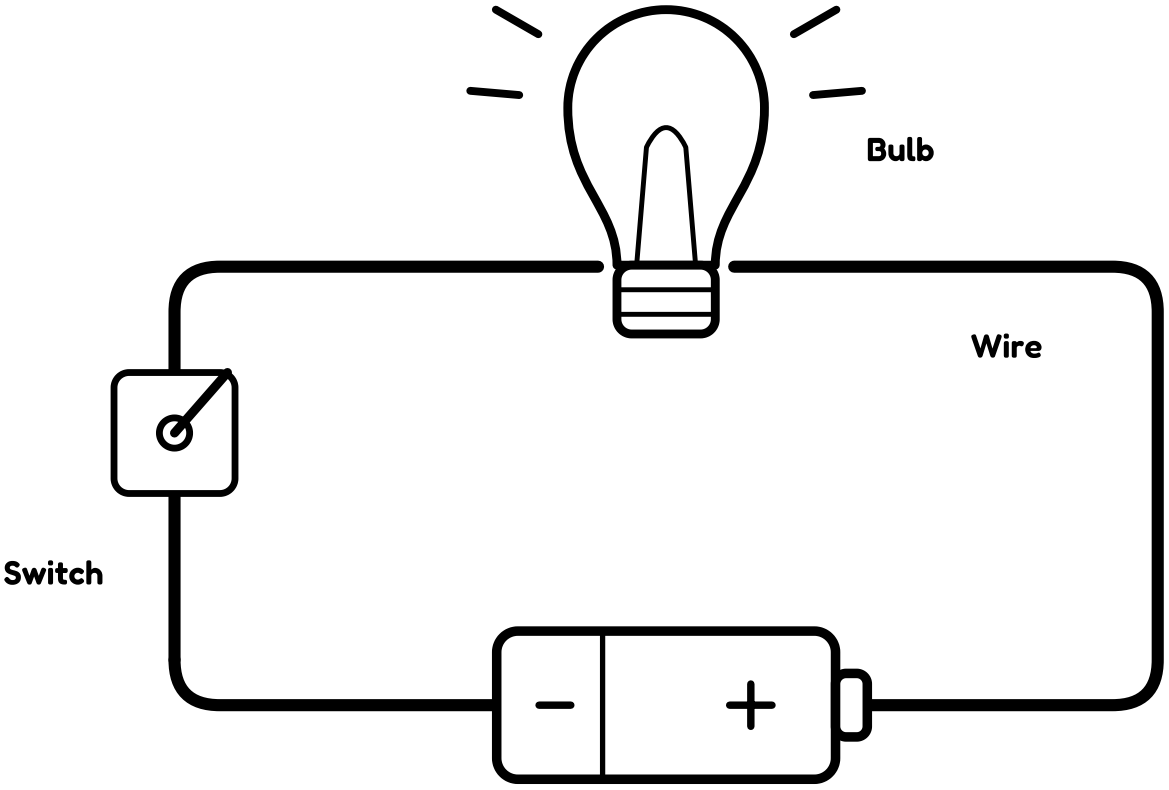

eats the frog

Did you know?

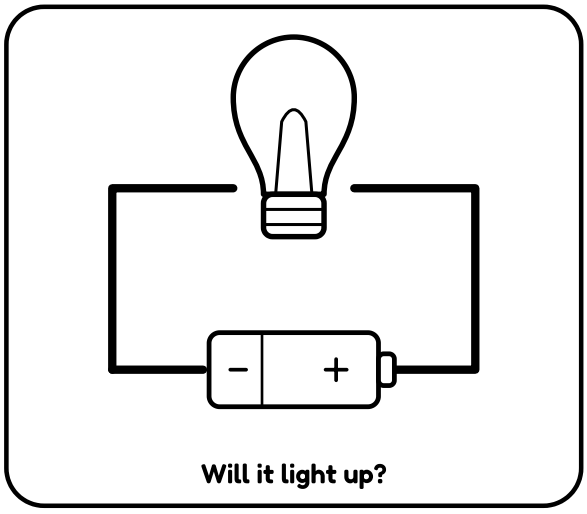

Every food chain starts with the Sun. Plants catch its energy, and animals get it by eating.

Light It Up!

Electricity flows all the way round!

Did you know?

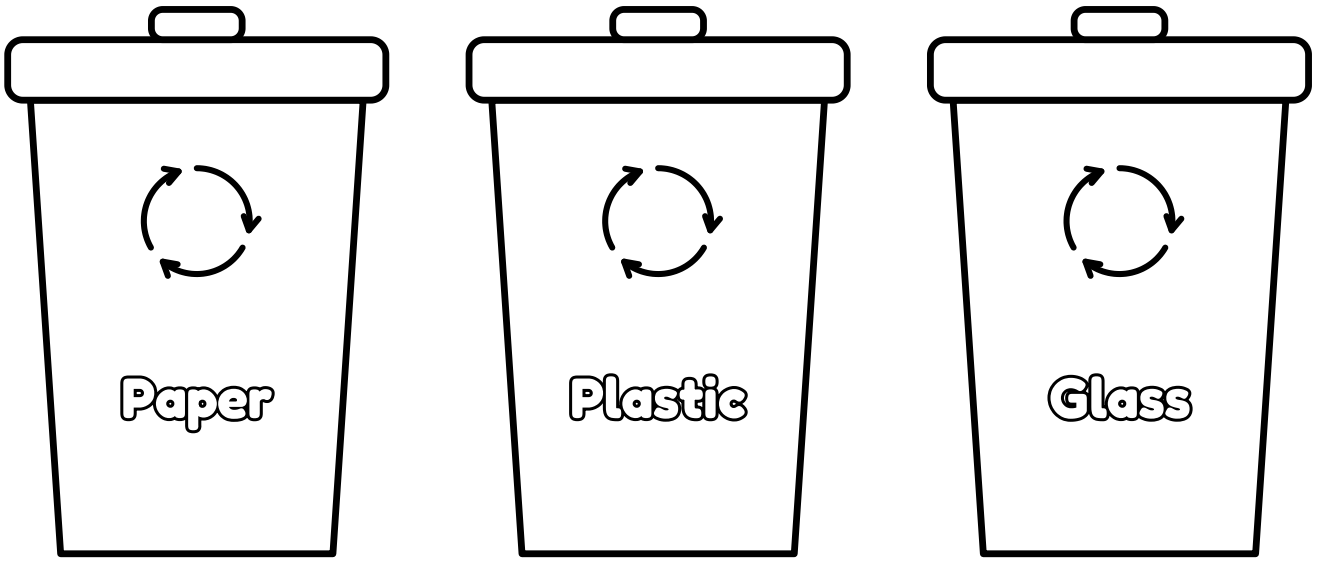

Electricity only flows when the circuit makes a full loop. A gap stops the light!

http://www.spiderclimbs.com, Avau hardware llc ©2026

Recycling Sort

Draw a line from each item to the right bin!

Did you know?

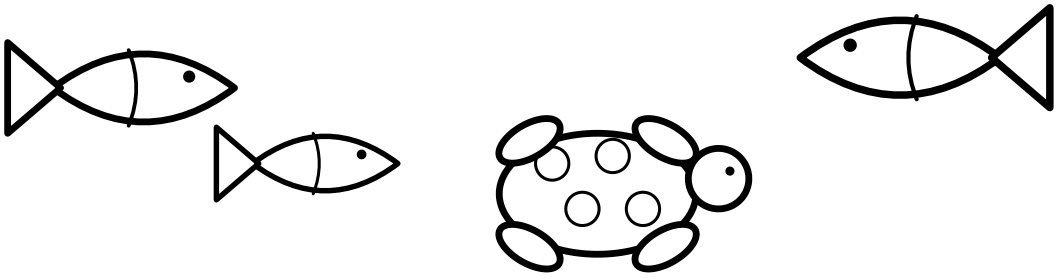

Recycling one glass bottle saves enough energy to light a bulb for hours!

http://www.spiderclimbs.com, Avau hardware llc ©2026

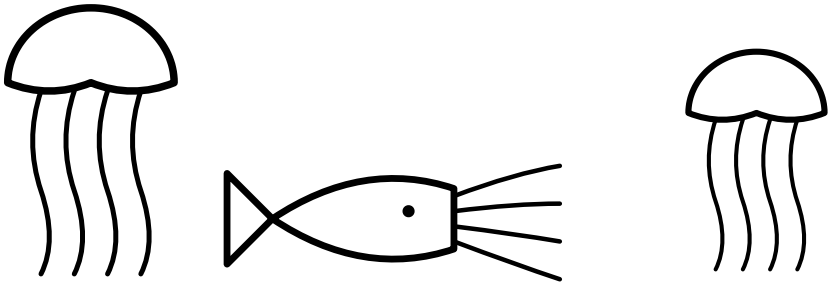

Ocean Zones

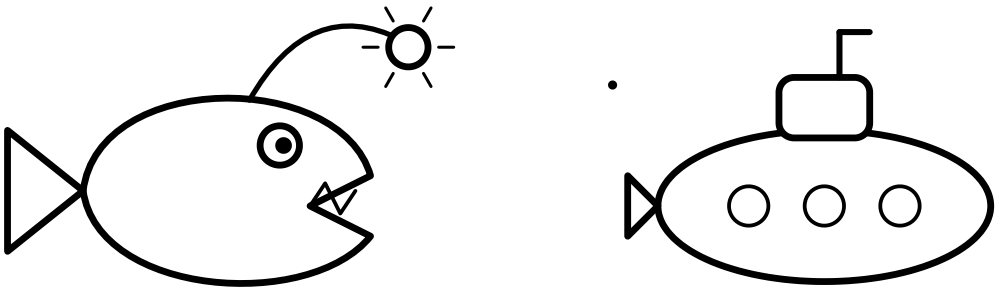

Sunlight zone

Twilight zone

Midnight zone

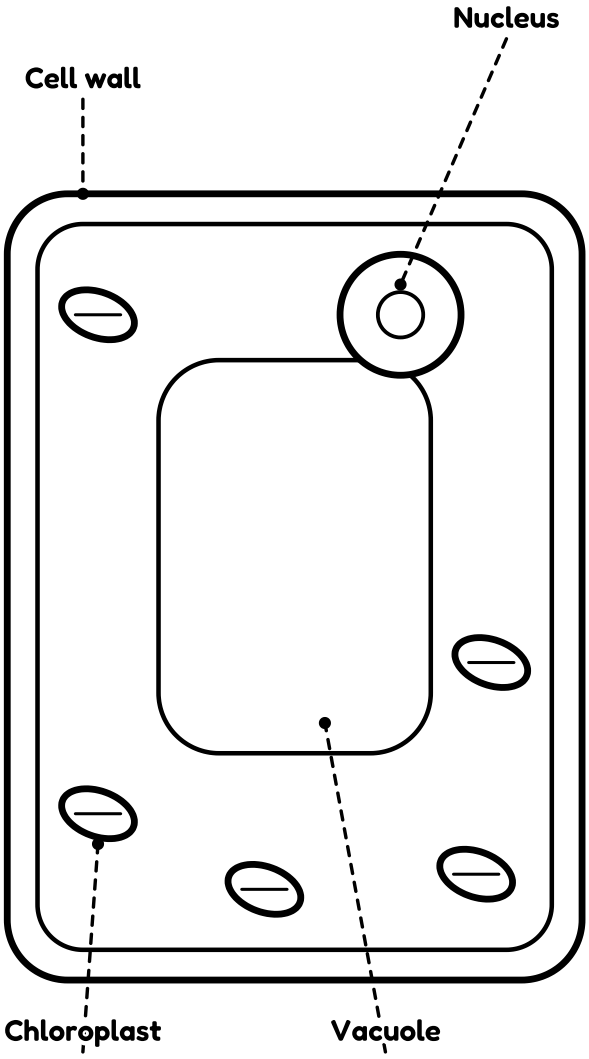

Did you know?

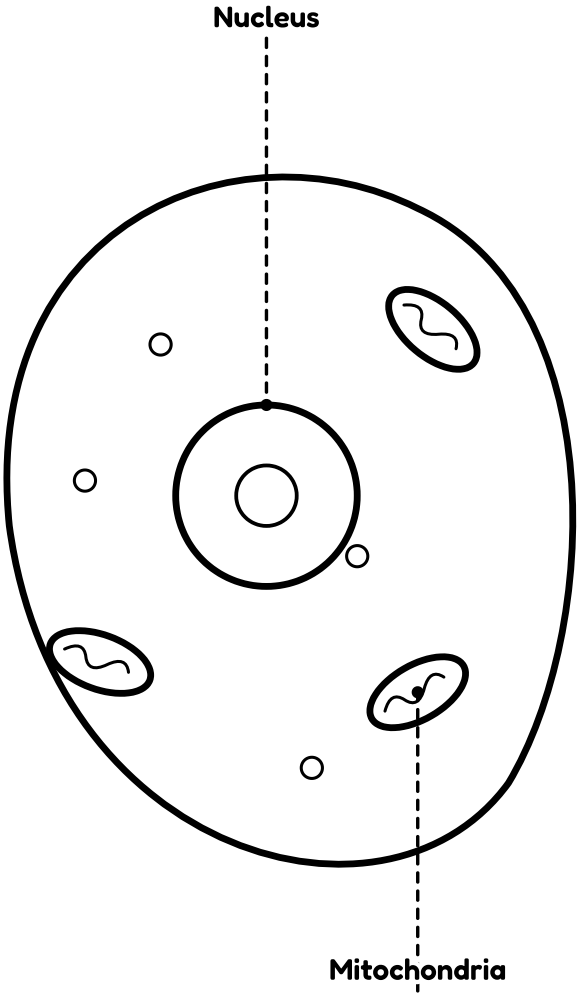

The deepest part of the ocean is so dark that some fish make their own light!

http://www.spiderclimbs.com, Avau hardware llc ©2026

Tiny Cells

Plant cell

Animal cell

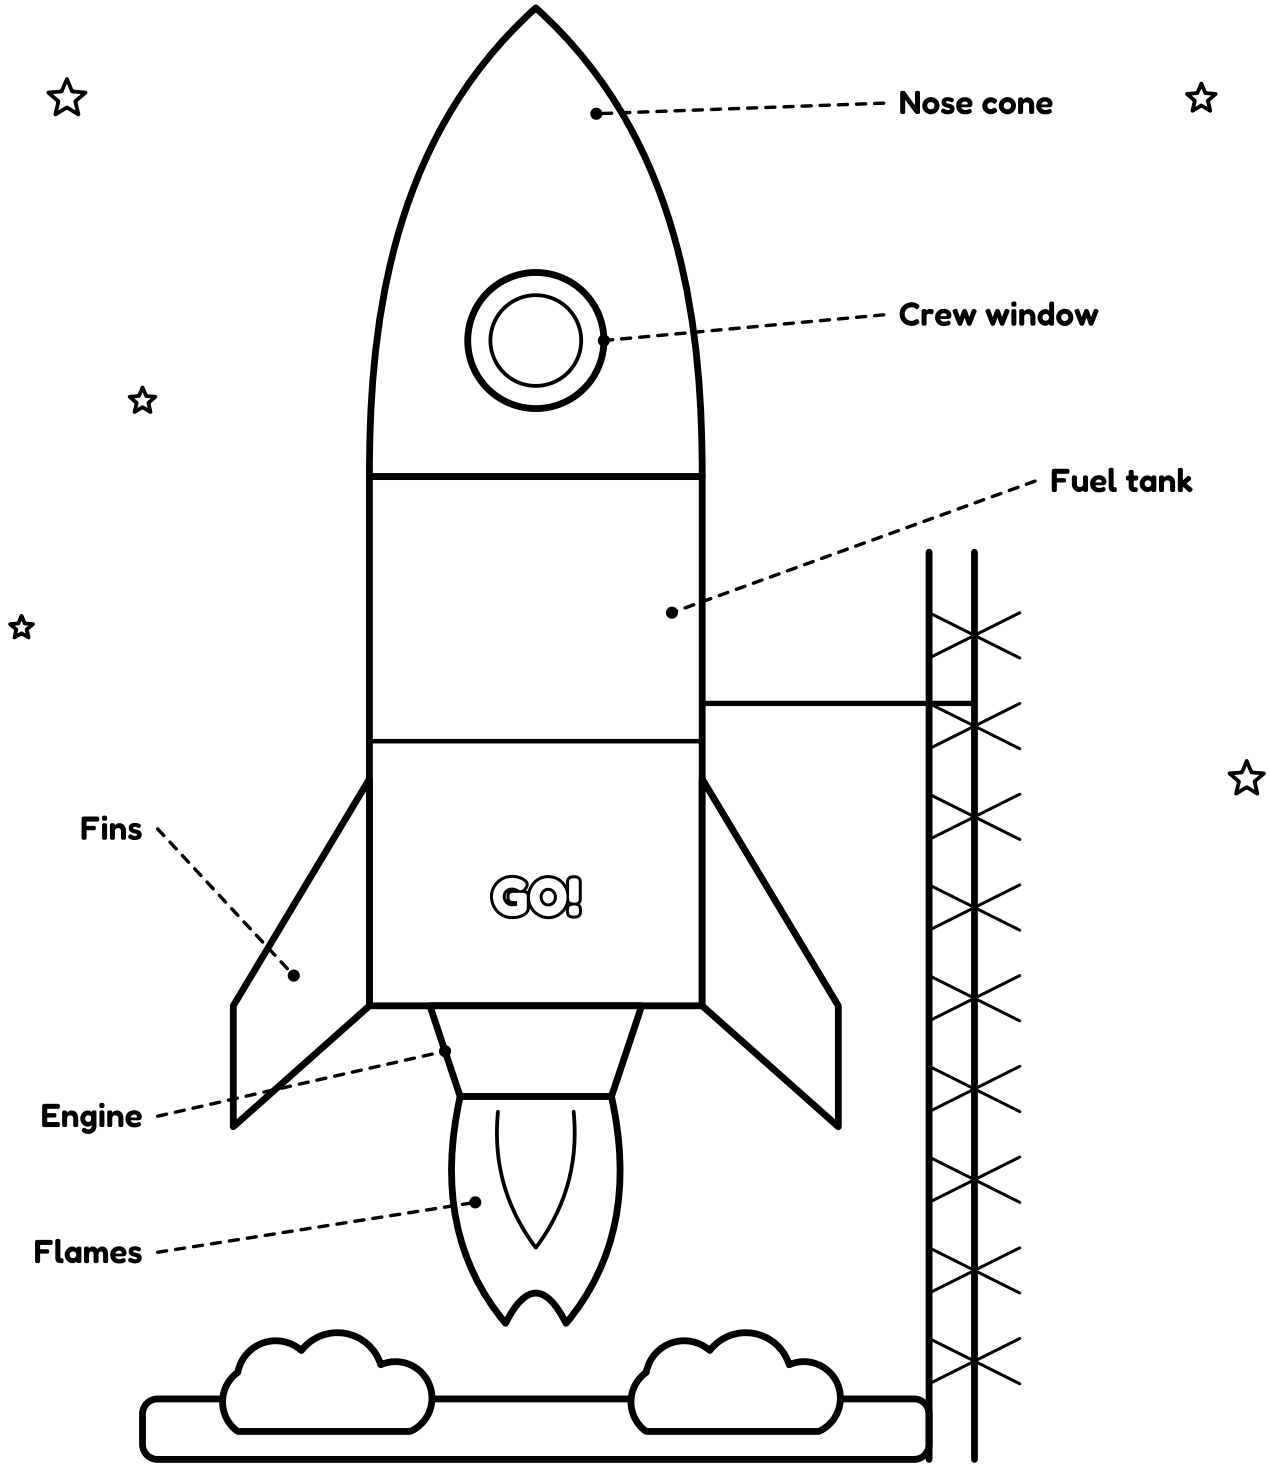

You need a microscope to see cells!

Did you know?

Your body is made of about 30 trillion tiny cells, all working together!

http://www.spiderclimbs.com, Avau hardware llc ©2026

Parts of a Rocket

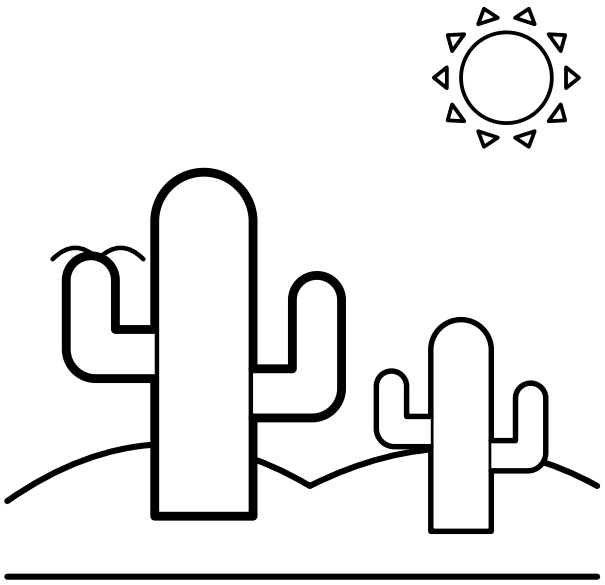

Did you know?

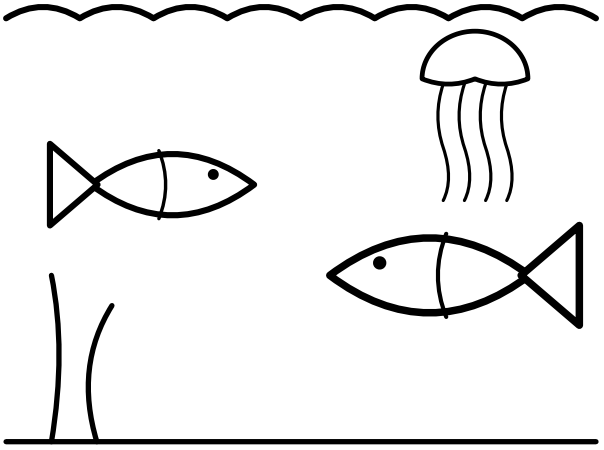

A rocket needs to go about 40,000 km per hour to escape Earth and fly into space!

http://www.spiderclimbs.com, Avau hardware llc ©2026

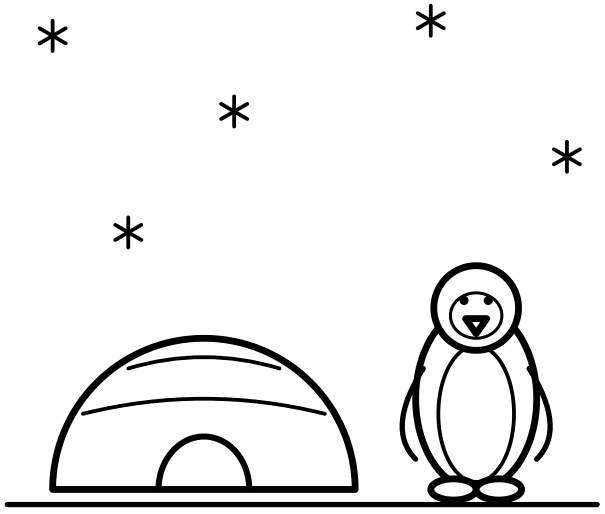

Animal Habitats

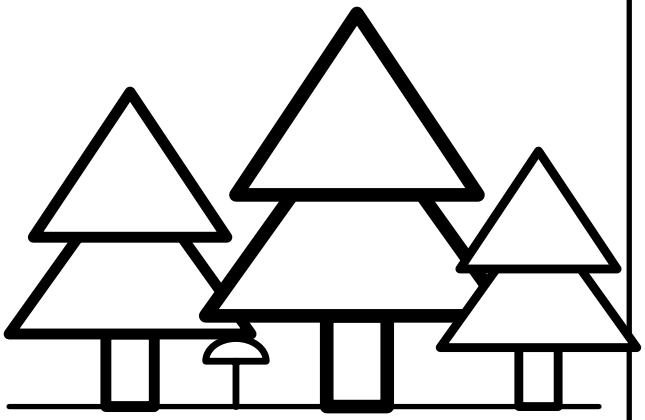

Desert

Ocean

Arctic

Forest

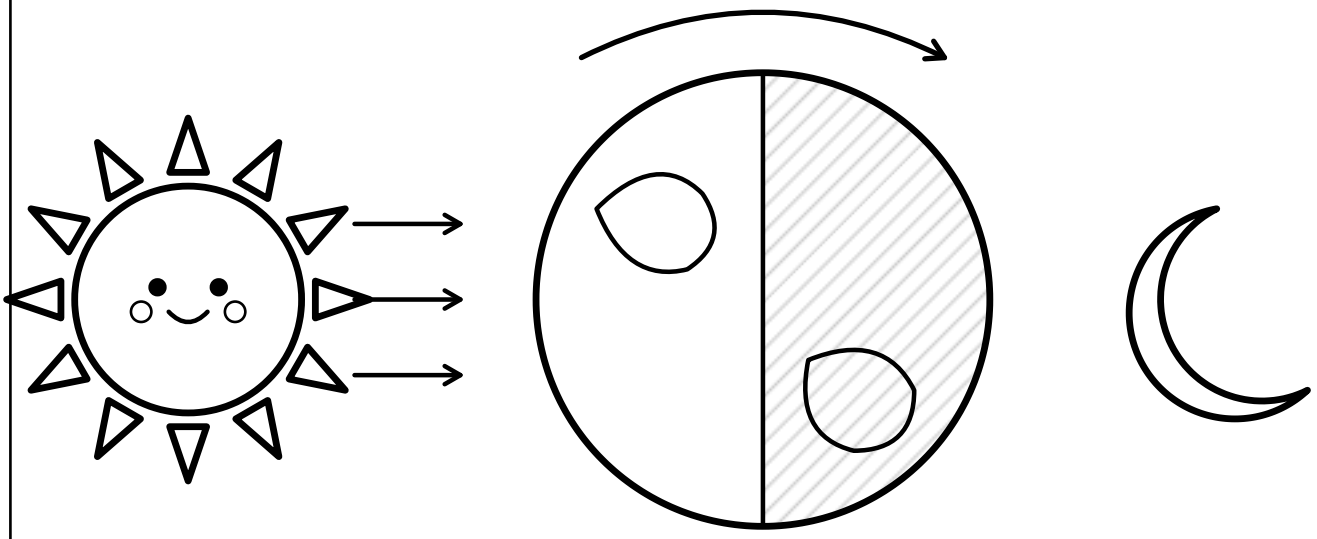

Did you know?

A habitat is a home that gives an animal food, water and shelter.

http://www.spiderclimbs.com, Avau hardware llc ©2026

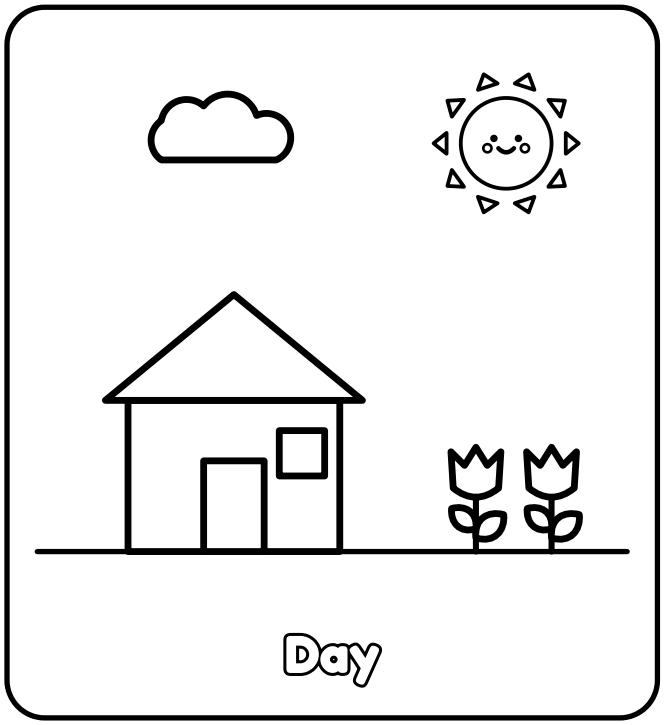

Day and Night

Earth spins

DAY NIGHT

Color the night side dark!

Day

Night

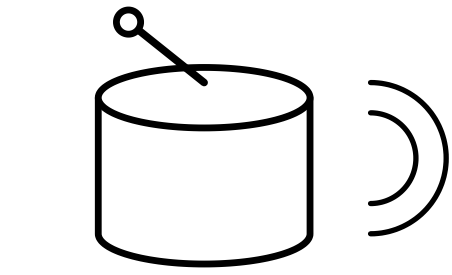

Did you know?

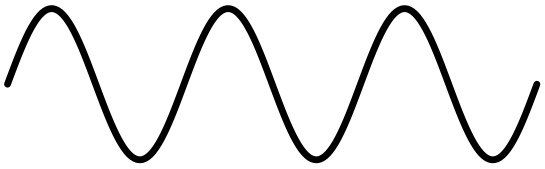

Earth spins all the way around once every 24 hours. That gives us day and night!

http://www.spiderclimbs.com, Avau hardware llc ©2026

The Sound of Science

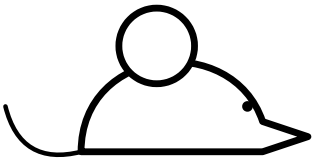

LOUD

big waves

QUIET

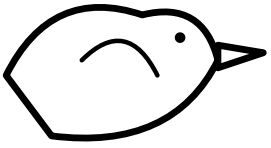

shh...

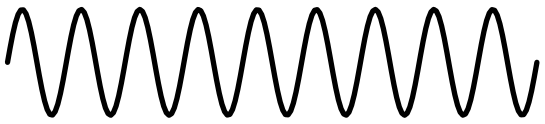

small waves

HIGH

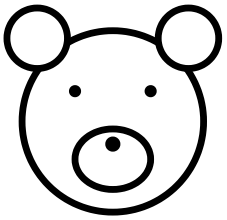

tweet!

waves close together

LOW

grrr!

waves far apart

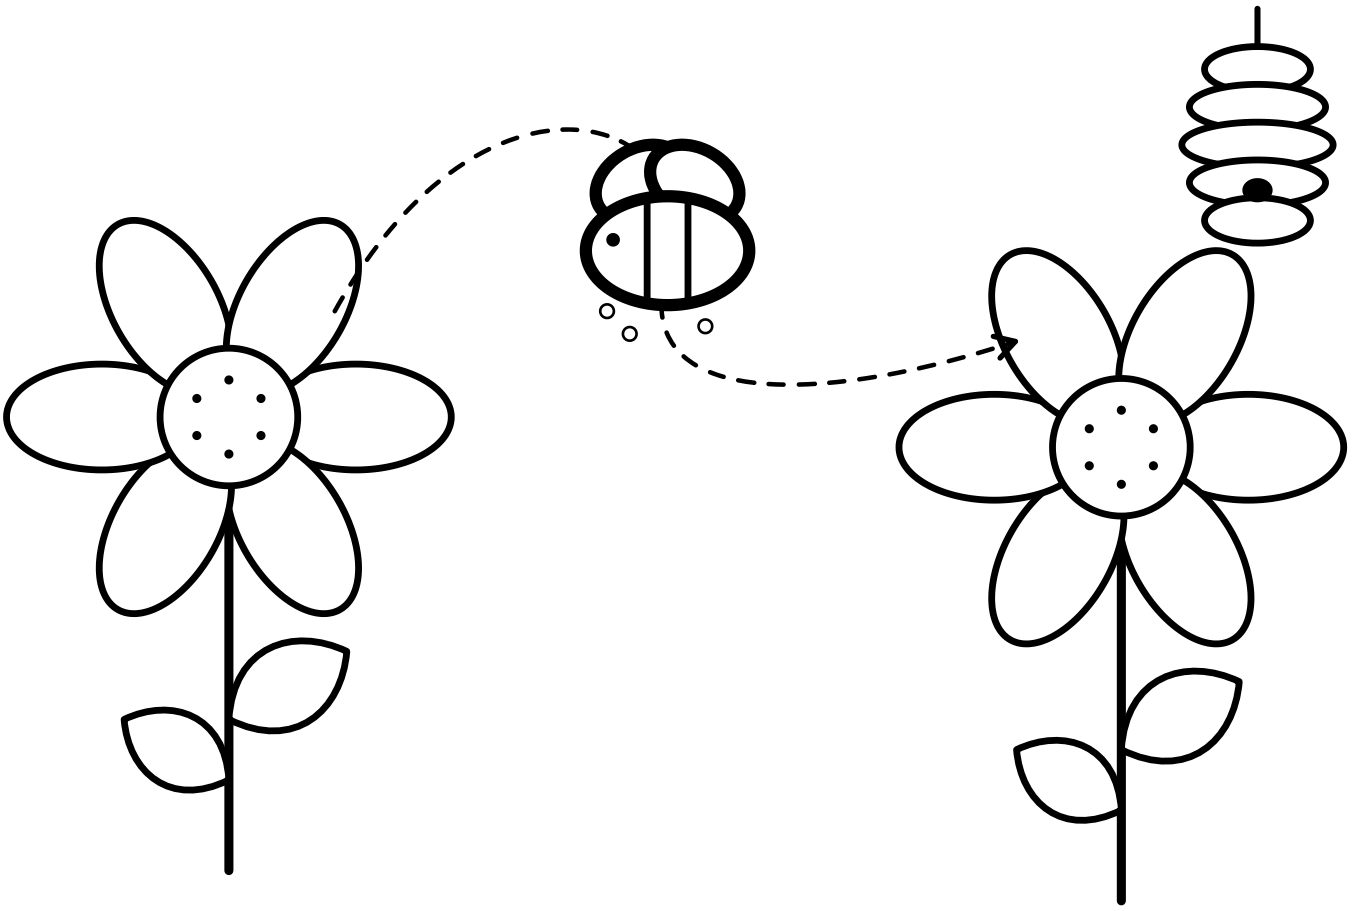

Did you know?

Sound is made when things vibrate, or wiggle back and forth very fast!

http://www.spiderclimbs.com, Avau hardware llc ©2026

Busy Bees

1. A bee visits a flower to drink sweet nectar.
2. Yellow pollen sticks to its fuzzy body.
3. The bee flies to the next flower.
4. The pollen helps that flower make seeds!

Did you know?

About one out of every three bites of food we eat depends on bees and other pollinators!
